Program description: The Draw the Line Campaign is designed to inform adults in Arizona that underage drinking is not a rite of passage, is unhealthy for children, and is against the law. It is important for adults to realize the influence they have on children's behavior. This campaign provides useful tools and resources to help adults positively influence kids. The central campaign mission is to generate community involvement and conversation by making interactive tools and resources available throughout the State. The campaign uses a Web site along with a traveling exhibit to get the word out. The purpose is to go beyond merely informing the public about the risks of underage drinking and alter the perceptions and behavior of the target audience—parents and adults ages 25 to 54.

<b>Additional Clarification</b>	
<p>The Arizona Substance Abuse Partnership (ASAP) was established by Executive Order 2007-12 in June 2007. Staffed by the Governor's Office for Children, Youth and Families and chaired by the Governor's Deputy Policy Director, ASAP is composed of representatives from State governmental bodies, Federal entities, and community organizations as well as individuals in recovery. ASAP serves as the single statewide council on substance abuse prevention, enforcement, treatment, and recovery efforts and,</p>	

through its Chair, is able to communicate the needs of the State to the Governor. ASAP works on strategic focus areas, including underage drinking, which are addressed through clear action steps carried out by member agencies. It is ASAP's mission to ensure community-driven, agency-supported outcomes to prevent and reduce the negative effects of alcohol, tobacco, and drugs by building and sustaining partnerships between prevention, treatment, recovery, and enforcement professionals.

Arizona's Underage Drinking Prevention Committee (UAD Committee) was established as a subcommittee under ASAP in 2005. The Governor's Office for Children, Youth and Families staffs this interagency committee, which is responsible for coordinating underage drinking prevention efforts across relevant State systems. The committee has worked tirelessly to address the problem of underage drinking in Arizona by assessing statewide epidemiological data, resources, strategies, and policies, and by building relationships with Tribes, youth, law enforcement, government agencies, and community coalitions. Partners on the committee include deputy directors, decisionmakers, and representatives from government and advocacy agencies that directly influence underage drinking. The UAD Committee works to maintain a comprehensive statewide prevention system to prevent and reduce underage drinking and to improve the health and safety of the citizens of Arizona by:

- Influencing State-level infrastructure change to improve cross-coordination and collaboration between agencies working to reduce UAD.
- Modifying social and economic norms, conditions, and adverse consequences resulting from alcohol availability, manufacturing, distribution, promotion, sales, and use.
- Effectively addressing at-risk and underserved youth populations and their environments.

A sample of the accomplishments of the UAD Committee includes:

- Expanded an online database (SYNAR) to collect information on vendors and their use of point-of-sale advertising for alcohol.
- Contributed to the passing of local social host ordinances that target adults who fail to use reasonable precaution to keep alcohol out of the hands of minors in several communities in Arizona.
- Created a "How to Restrict Public Drinking" brochure and provided training to community-based substance abuse coalitions on this environmental prevention strategy.
- Hosted webinar trainings for prevention providers on environmental prevention strategies.
- Attempted to discontinue the sale of Old Navy merchandise that promotes binge drinking among youth.
- Recruited schools in Tribal nations and non-Tribal communities to participate in the 2010 Arizona Youth Survey.
- Encouraged community coalitions to use the Draw the Line Campaign Web site's tools, templates, and information to change parental perceptions of underage alcohol use as a rite of passage.
- Prepared materials for workplace training on the legal aspects of underage alcohol use and parenting skills.
- Completed an inventory of community-based substance abuse prevention coalitions in Arizona, which revealed that more than 100 coalitions are actively implementing substance abuse prevention programs in Arizona.

The Community Advisory Board (CAB), as described in the ASAP Executive Order, represents counties and Tribal communities. CAB provides perspective to ASAP on community-specific issues throughout the State with a special emphasis on rural communities. CAB brings representatives from community coalitions around the State together to improve substance abuse prevention, treatment, and enforcement policy and programs. CAB provides an essential link between communities and ASAP, ensuring that Arizona has a comprehensive substance abuse infrastructure responsive to and inclusive of its citizens. Continuing efforts focus on expanding the use of social media to connect community coalitions across the State and to share best practices and advocate for prevention, and building prevention capacity at State and local levels through ASAP and its member agencies and organizations. Moving forward, the efforts of CAB will be combined with those of the UAD Committee to provide an essential link between community partners and their efforts and the Arizona agencies and entities responsible for State-level underage drinking policy. This expanded group has the capacity to coordinate and address underage drinking prevention activities through its connection to ASAP. This important body will continue to bring a voice to ASAP, reporting on important issues in Arizona's communities in a way that is productive and facilitates

work in the Strategic Focus Areas; will help communities improve their capacity to identify emerging trends; and will help them take action and report them to the proper institutions. Using the data available through the Substance Abuse Epidemiology Work Group, this group will effectively target populations and programs. Furthermore, this body will serve as a resource for communities and the State to identify the most effective ways of influencing substance abuse by working collaboratively and targeting limited resources where they are most needed.
