Knowledge Informing Transformation

This document was produced for the Substance Abuse and Mental Health Services Administration (SAMHSA), U.S. Department of Health and Human Services (HHS) under contract numbers 280-00-8049 with the New Hampshire-Dartmouth Psychiatric Research Center and 270-03-6005 with Westat.
What is Illness Management and Recovery (IMR)?

IMR, an evidence-based practice, gives consumers information about mental illnesses and coping skills to help them

- Manage their illnesses;
- Develop goals; and
- Make informed decisions about their treatment

Why participate in IMR?

Knowledge empowers people. The more people understand the basic facts about their mental illnesses, the better equipped they are to speak for themselves and take an active role in their recovery.

How does IMR work?

- Consumers define recovery
  IMR practitioners help consumers define recovery for themselves and identify personally meaningful recovery goals.

- Information is power
  Education about mental illnesses is the foundation of informed decisionmaking.

- Collaboration is key
  Practitioners help consumers build social networks and engage supporters in activities that promote recovery.

- Plans can help prevent relapses
  Consumers learn to identify early warning signs and plan steps that they can take to prevent relapses.

- Illness management strategies work
  Consumers learn new strategies to help them manage their symptoms, cope with stress, and significantly improve their lives.
