# 2022 STATE REPORTS – UNDERAGE DRINKING PREVENTION AND ENFORCEMENT

**ICCPUD**

**THE INTERAGENCY COORDINATING COMMITTEE  
ON THE PREVENTION OF UNDERAGE DRINKING (ICCPUD)**

This *State Report* is required by the Sober Truth on Preventing (STOP) Underage Drinking Act (Pub. L. 109-422), enacted by Congress in 2006 and reauthorized in December 2016 as part of the 21st Century Cures Act (Pub. L. 114-255). The STOP Act requires an annual report “on each State’s performance in enacting, enforcing, and creating laws, regulations, and programs to prevent or reduce underage drinking.” As directed by the STOP Act, the State Reports were prepared by the Interagency Coordinating Committee on the Prevention of Underage Drinking (ICCPUD), chaired by Miriam Delphin-Rittmon, Ph.D., the Assistant Secretary for Mental Health and Substance Use, U.S. Department of Health and Human Services (HHS).

**Time Period Covered by this *State Report*:** This *State Report* primarily includes data from calendar year 2020 and 2021. Regional and state profile data were drawn from the most recently available federal survey data as of 2020. State legal data reflect the status of the law as of January 1, 2021. State survey data, collected in 2021, were drawn from the most recent 12-month period in which the states maintained the data.

**Source of Data:** For each state, overall population information was taken from 2010 Census data. Data about the portion of each state’s population comprising 12-to 20-year-olds, as well as facts about past-month alcohol use and binge use, were averaged from the 2017 through 2020 National Surveys on Drug Use and Health (NSDUH), SAMHSA’s Center for Behavioral Health Statistics and Quality (CBHSQ), and the NSDUH special data analysis (2021). Confidence intervals for these estimates are available from CBHSQ’s Division of Surveillance and Data Collection on request. The Centers for Disease Control and Prevention’s Alcohol-Related Disease Impact (ARDI) application (updated May 2022) served as the resource for data about alcohol-attributable deaths from 2015–2019 among youth under age 21. ARDI was also the source for state-level data on years of potential life lost as a result of underage alcohol-related fatalities. The National Center for Statistics and Analysis’s Fatality Analysis Reporting System (FARS) provided the 2020 data used to present statistics about fatalities among 15- to 20-year-old drivers. State legal policy data were obtained from the following sources: 1) the National Institute on Alcohol Abuse and Alcoholism’s Alcohol Policy Information System (APIS) website (<https://alcoholpolicy.niaaa.nih.gov/>); 2) legal research planned and managed by the ICCPUD.

<sup>1</sup> The Alcohol-Related Disease Impact Application was updated May 2022 to reflect new methodology for calculating the average annual alcohol-attributable deaths, and it reflects national and state annual averages from 2015–2019.

<sup>2</sup> Alcohol-related fatalities are estimates derived from a sophisticated statistical procedure. The estimates are rounded to the nearest whole number; however, percentages as displayed are calculated from the unrounded estimates and may not equal those calculated from the rounded estimates. Totals may not equal the sum of components due to independent rounding.

## Behavioral Health Services<sup>1</sup>

Arizona Health Care Cost Containment System (AHCCCS) is the single state Medicaid agency for the State of Arizona. In that capacity, it is responsible for operating the Title XIX and Title XXI programs through the State’s 1115 Research and Demonstration Waiver, which allows for the operation of a total managed care model.

AHCCCS’ mission “reaching across Arizona to provide comprehensive, quality health care to those in need” is implemented through the vision of “shaping tomorrow’s managed care...from today’s experience, quality, and innovation.” Built on a system of competition and choice, AHCCCS’ \$14 billion program operates under an integrated managed care model.

On October 1, 2018, AHCCCS took the largest step to date toward this strategic goal of fully integrated care delivery when 1.6 million members were enrolled in one of AHCCCS’ Complete Care (ACC) health plans and American Indian Health Plans (AIHP). ACC plans and AIHP provide a comprehensive network of providers to deliver all covered physical and behavioral health services to child and adult members without a Serious Mental Illness (SMI) designation. The ACC plans and AIHP also provide services for members with Children’s Rehabilitative Services (CRS) conditions. ACC plans and AIHP address the whole health needs of our state’s Medicaid population which is vitally important to improving service delivery for AHCCCS members and reducing the fragmentation that has existed in our healthcare system. The YH19-0001 AHCCCS Complete Care Request for Proposal [ACC RFP (Request for Proposals)] awarded in March of 2018 resulted in seven awarded ACC plans across the state in three Geographic Service Areas: north, central, and south.

Through the ACC contracts, Managed Care Organizations (MCO’s) are responsible for providing physical, behavioral, and long-term care services. AHCCCS also operates the American Indian Health Program (AIHP), a fee for service program that is responsible for care for American Indian members who select AIHP. AHCCCS also has five unique intergovernmental agreements with Tribal Regional Health Authorities (TRBHAs) for the coordination of behavioral health services for American Indian members enrolled with a TRBHA. The YH19-0001 AHCCCS Complete Care Request for Proposal (ACC RFP) awarded in March of 2018 resulted in seven awarded ACC plans across the state in three Geographic Service Areas: North, Central, and South. Three of these ACC plans are affiliated with current AHCCCS Regional Behavioral Health Authorities (RBHA) and were required to align the RBHA and ACC contracts under one organization.

In addition to overseeing the managed care organizations that provide Medicaid-funded health care services, AHCCCS serves as the Single State Authority on substance use, and as the State Mental Health Authority (SMHA) responsible for the state public mental health service delivery system administration. AHCCCS is the agency responsible for mental health and substance use and provides oversight, coordination, planning, administration, regulations, and monitoring of all facets of the public behavioral health system in Arizona.

Assess the strengths and needs of the service system to address the specific populations.

## Substance Abuse Block Grant (SABG) Primary Prevention

To streamline prevention services, AHCCCS made the decision to administer the prevention contracts directly. This decision was effective as of July 1, 2021, and AHCCCS procured 20 local community-based coalitions through a competitive Request for Proposal (RFP) process. In addition to the administration of funding for local community-based prevention coalitions, AHCCCS has Intergovernmental Agreements (IGAs) with two of the state's TRBHAs, the Pascua Yaqui Tribe and the Gila River Indian Community, to administer SABG primary prevention funding to tribal populations within the state. AHCCCS also has a relationship with the Governor's Office of Youth, Faith, and Family (GOYFF) to provide substance abuse prevention services through Evidence Based Practices (EBPs) and community-based organizations. All SABG Primary Prevention efforts are administered utilizing the Strategic Prevention Framework (SPF) Model from the Substance Abuse and Mental Health Services Administration (SAMHSA) with these funds. AHCCCS currently utilizes a variety of providers to implement prevention services, including community-based coalitions, schools, and various state agencies. AHCCCS prevention efforts currently focus on several substances, including alcohol, tobacco, prescription drugs, and opioids. AHCCCS prevention efforts include focusing on a Risk and Protective Factor Theory, which includes reducing risk factors, and increasing protective factors, in a variety of settings. To address the unique needs of the state with these funds, AHCCCS will also address Adverse Childhood Experiences (ACEs) and trauma to ensure all high-risk individuals are receiving the appropriate types of services. AHCCCS will continue to support all prevention providers in offering services virtually, as appropriate, to ensure the health and safety of all participants. All primary prevention services will serve populations according to the Institute of Medicine (IOM) categories as follows: Universal (Indirect and Direct), Selective, and Indicated.

## Substance Abuse Block Grant (SABG) Treatment

SABG funds are used to ensure access to interventions, treatment, and long-term recovery support services for (in order of priority):

1. Pregnant women (including teenagers) who use drugs by injection,
2. Pregnant women (including teenagers) who use substances,
3. Other persons who use drugs by injection,
4. Substance using women and teenagers with dependent children and their families, including females who are attempting to regain custody of their children, and
5. All other individuals with a substance use disorder, regardless of gender or route of use, (as funding is available).

## Expenditures for Substance Abuse Prevention and Treatment

All states receive federal funds for substance abuse prevention through SABG funds administered by SAMHSA. Exhibit 1 shows the sources that Arizona used for expenditures on substance abuse prevention and treatment in 2021. As indicated, Medicaid funds and SABG funds account for the largest sources (86.59 percent and 7.03 percent, respectively).<sup>2</sup>

<sup>2</sup> WebBGAS State Profile, 2021 SABG and Community Mental Health Block Grant (MHBG) Reports – Arizona 2021.

States submit Behavioral Assessment and Plan reports that include their priorities for use of SABG funds, as well as planned expenditures. For FY 2022–2023, Arizona designated reducing the number of underage persons at high risk for alcohol, tobacco, and other drug use as the number one priority for use of SABG funds. Decreasing the percentage of youth reporting past month alcohol use was designated the number two priority.<sup>3</sup>

## State Performance: Laws, Enforcement, and Programs

As mandated by the STOP Act, this report details Arizona's performance in enacting, enforcing, and creating laws, regulations, and programs to prevent or reduce underage drinking.

The following sections address these measures:

***State Laws and Policies:*** These underage drinking prevention policies have been identified as best practices (or as promising practices suitable for ongoing evaluation) and fall into six categories:

- underage possession or purchase of alcohol
- underage drinking and driving
- alcohol availability
- sales and delivery to consumers at home
- alcohol pricing
- enforcement policies

***STOP Act State Survey Data:*** The STOP Act requires annual reporting of data from the 50 states and the District of Columbia on their performance in enacting, enforcing, and creating laws, regulations, and programs to prevent or reduce underage drinking. Administered since 2011, the STOP Act State Survey collects data on the following topics:

- enforcement programs to promote compliance with underage drinking laws and regulations
- programs targeted to youth, parents, and caregivers to deter underage drinking
- state interagency collaborations to implement prevention programs, best-practice standards, collaborations with tribal governments, and participation in underage drinking media campaigns
- state expenditures on the prevention of underage drinking

**Program Description:** -Adolescent Alcohol Use & Risk: The presentation reviews an in-depth decision on the dangers of underage drinking and the consequences associated with it. Parents and educators learn communication tips, along with creating a family safety plan to build protective factors in their child. This presentation can be provided in English and Spanish.

-The Risk of Underage Drinking for youth provides an in-depth look at the dangers of underage drinking and identifies various types of risky behaviors associated with alcohol consumption. Youth ages 12–18 will leave the course having learned the health risks (both mental and physical) and legal ramifications of drinking, as well as strategies for resistance. We incorporate “Fatal Vision” goggles for students who then practice a “field sobriety test” to provide a realistic understanding of impairment. The presentation for adults is designed for parents, guardians, and those who directly work with youth. It focuses on the risks associated with underage drinking, the latest trends, and the laws and consequences of alcohol possession or consumption by a youth. Participants learn skills and ways to engage youth to decrease the likelihood that they will experiment with drugs or alcohol, as well as how to begin a proper dialogue with youth about substance use.

#### Additional Information Related to Underage Drinking Prevention Programs

*State collaborates with federally recognized tribal governments in the prevention of underage drinking*

Yes

Description of collaboration:

-Healthy People Coalition: Native American Advancement Foundation (NAAF)

Comprised of community members of Gu Vo District on the Tohono O’odham Nation, the Healthy People Coalition will utilize effective prevention strategies, activities, and evidence-based curriculum to promote healthful behaviors, decisions, and environments that will reduce, postpone, or eliminate the problematic use of alcohol and illicit substances among the youth of Gu Vo District.

-San Carlos Apache Tribe Wellness Center

The Wellness Center offers individual, family, and group counseling and therapy; has numerous treatment groups and a DUI psycho education program that meets state certification; offers crisis stabilization throughout the community (San Carlos Hospital ER, Detention Center, schools, etc.); offers a 4-hours-a-day, 5-days-a-week psychosocial rehabilitation program; and has an award-winning prevention program that offers education and health promotion throughout the community.

- Arizona Youth Partnership (AZYP)

AZYP works with the Hwal’bay Hmany did Gev’ik coalition in Peach Springs. One of their goals is to reduce underage drinking. Liquor bottle locks are distributed along with information to parents and caregivers. Information is disseminated during school events and community events.

-The Arizona Parents Commission on Drug Education and Prevention provides funding to sub-grantees who collaborate with Tribal Nations in Arizona. The intended goals of these partnerships are to maintain an effective coalition, increase youth leadership and efficacy skills, increase youth perceptions of the risks and harms associated with the use of alcohol and controlled substances, and increase community members' perceptions of risks and harms in youth use of alcohol and controlled substances.

-The Arizona Partnership for Success (PFS) collaborates with Tribal Nations in Arizona. The intended goals of these partnerships are to maintain an effective coalition, increase youth leadership and efficacy skills, increase

youth perceptions of the risks and harms associated with the use of alcohol, and increase community members' perceptions of risks and harms in youth use of alcohol.

-The GOYFF collaborates on the TISAPP Program with Tribal Nations in Arizona. The intended goals of these partnerships are to maintain an effective coalition, increase resiliency skills, and increase youth, family, and community members' perceptions of risks and harm in youth use of alcohol and controlled substances.

-Through Mercy Care's SABG primary prevention funding, we do collaborate with Salt River Pima Maricopa Indian Community, Fort McDowell Yavapai Nation, and Tohono O'odham (Village of San Lucy). Gila River has its own Tribal Regional Behavioral Health contract with Arizona Health Care Cost Containment System (AHCCCS). We subcontract with Phoenix Indian Center in the central Arizona region, who serves urban Native American tribal members from many of the federally recognized tribes in our region.

<p><i>State has programs to measure and/or reduce youth exposure to alcohol advertising and marketing</i></p>	<p>Yes</p>
<p>Description of program:</p> <p>-Douglas Community Coalition: Southeastern Arizona Behavioral Health Service (SEABHS)                  The town of Douglas, Arizona, maintains a strong history of collaborating and working together as a community, regardless of challenging situations arising from its close proximity to the U.S.–Mexico border. Since the coalition’s first meeting in 2010, it was clear that its main purpose was to strengthen collaboration by changing social norms that contribute to substance abuse and misinformation. In particular, the coalition has used local data and results from recent needs and assets assessment to identify their main aim as preventing underage drinking through a strengths-based approach.</p> <p>-Refugee Integrated Services Provider Network (RISP-NET): La Frontera Arizona                  RISP-Net was established in 2002 as a local advisory committee to a refugee family strengthening project in Tucson, Arizona. The coalition expanded its mission in 2005 to include all refugee groups in Tucson. It is currently comprised of more than 150 stakeholders from all systems serving refugees, including health care, public education, law enforcement, Department of Economic Security, resettlement agencies, the public library, and refugees themselves. Its stated purpose is to illuminate the issues impacting the successful acculturation of refugee families in Tucson, Arizona, and to work collaboratively for positive systems change.</p> <p>-Youth Empowerment and LGBTQ Leadership (Y.E.L.L.): Southern Arizona AIDS Foundation (SAAF)                  The Youth Empowerment and LGBTQ Leadership coalition aims at supporting LGBTQ youth and their allies in identifying risk reduction techniques around substance use. The coalition will participate in and support local events promoting public health and intends to recruit interested youth and community supports at these events. With youth support, we created a youth-led subcommittee comprised of LGBTQ and allied youth with goals around educating their peers. Using the Botvin Life Skills training curriculum, we cultivate leadership, communication, decision making, and public speaking skills with the youth as a way to support the youth subcommittee to effectively engage and educate their peers around the risks of substance use.</p> <p>-Yuma County Anti-Drug Coalition                  The Yuma County Anti-Drug Coalition (YCAD) is a multi-disciplinary coalition with members from many different community sectors, and we strive to bring substance abuse prevention, education, awareness, and treatment resources to community members.
