# 2022 STATE REPORTS – UNDERAGE DRINKING PREVENTION AND ENFORCEMENT

**ICCPUD**

**THE INTERAGENCY COORDINATING COMMITTEE  
ON THE PREVENTION OF UNDERAGE DRINKING (ICCPUD)**

This *State Report* is required by the Sober Truth on Preventing (STOP) Underage Drinking Act (Pub. L. 109-422), enacted by Congress in 2006 and reauthorized in December 2016 as part of the 21st Century Cures Act (Pub. L. 114-255). The STOP Act requires an annual report “on each State’s performance in enacting, enforcing, and creating laws, regulations, and programs to prevent or reduce underage drinking.” As directed by the STOP Act, the State Reports were prepared by the Interagency Coordinating Committee on the Prevention of Underage Drinking (ICCPUD), chaired by Miriam Delphin-Rittmon, Ph.D., the Assistant Secretary for Mental Health and Substance Use, U.S. Department of Health and Human Services (HHS).

**Time Period Covered by this *State Report*:** This *State Report* primarily includes data from calendar year 2020 and 2021. Regional and state profile data were drawn from the most recently available federal survey data as of 2020. State legal data reflect the status of the law as of January 1, 2021. State survey data, collected in 2021, were drawn from the most recent 12-month period in which the states maintained the data.

**Source of Data:** For each state, overall population information was taken from 2010 Census data. Data about the portion of each state’s population comprising 12-to 20-year-olds, as well as facts about past-month alcohol use and binge use, were averaged from the 2017 through 2020 National Surveys on Drug Use and Health (NSDUH), SAMHSA’s Center for Behavioral Health Statistics and Quality (CBHSQ), and the NSDUH special data analysis (2021). Confidence intervals for these estimates are available from CBHSQ’s Division of Surveillance and Data Collection on request. The Centers for Disease Control and Prevention’s Alcohol-Related Disease Impact (ARDI) application (updated May 2022) served as the resource for data about alcohol-attributable deaths from 2015–2019 among youth under age 21. ARDI was also the source for state-level data on years of potential life lost as a result of underage alcohol-related fatalities. The National Center for Statistics and Analysis’s Fatality Analysis Reporting System (FARS) provided the 2020 data used to present statistics about fatalities among 15- to 20-year-old drivers. State legal policy data were obtained from the following sources: 1) the National Institute on Alcohol Abuse and Alcoholism’s Alcohol Policy Information System (APIS) website (<https://alcoholpolicy.niaaa.nih.gov/>); 2) legal research planned and managed by the ICCPUD.

<sup>1</sup> The Alcohol-Related Disease Impact Application was updated May 2022 to reflect new methodology for calculating the average annual alcohol-attributable deaths, and it reflects national and state annual averages from 2015–2019.

<sup>2</sup> Alcohol-related fatalities are estimates derived from a sophisticated statistical procedure. The estimates are rounded to the nearest whole number; however, percentages as displayed are calculated from the unrounded estimates and may not equal those calculated from the rounded estimates. Totals may not equal the sum of components due to independent rounding.

## The Department of Behavioral Health and Developmental Disabilities<sup>1</sup>

Created by the Governor and General Assembly in 2009, the Georgia Department of Behavioral Health and Developmental Disabilities (DBHDD) and its network of community providers offer treatment and support services to help people with behavioral health challenges achieve recovery by focusing on their strengths. Through uniquely tailored supports and services, the department also helps people with intellectual and developmental disabilities attain independence and lead meaningful and fulfilling lives. As a Cabinet-level department, DBHDD is the state agency responsible for administration, coordination, planning, regulation and monitoring of all components of the state public behavioral health and intellectual and developmental disability systems. DBHDD operates state hospitals and provides for community-based services across the state through contracted providers. As Georgia's public safety net, the department's primary responsibility is to serve people who are uninsured. Individuals on Medicaid and others with few resources or options are also served.

The DBHDD system of services is administered through six Field Offices that serve Georgia. These offices administer the hospital and community resources assigned to the region. The regional field offices are responsible for: 1) locating and coordinating services and supports; 2) monitoring the services being received by consumers to ensure quality and access; 3) developing new services and expanding existing services as needed; 4) investigating and resolving complaints; 5) conducting special investigations and reviews when warranted; and 6) overseeing statewide initiatives. Regional Offices are the administrative offices of the Department, responsible for the implementation and administration of the plans, policies, and directives issued by the Department.

The Regional Field Offices ensure that services brokered by DBHDD are implemented and provided according to design -- "Easy access to high-quality care that leads to a life of recovery and independence for the people we serve." These Offices support the network of providers in their regions to assure a full array of services and supports to individuals needing publicly funded services. Each Field Office is managed by a Regional Services Administrator (RSA). These RSAs develop and maintain effective working relationships with all stakeholders in the Region through regular meetings with providers, consumers, family members, advocates, elected officials, Regional Advisory Council (RAC) members and other social services agencies. Under broad supervision of the Director of Field Operations, the RSAs are responsible for managing and overseeing a system of community-based Behavioral Health services for the regions. This means working closely with Regional Advisory Councils (RAC), local community collaboratives, providers both in and out of the network, DBHDD Central Office, the Director of Field Operations, and their counterparts across the state to assure continuity and quality of services across regions. Referenced earlier was the partnership/meetings each region has with the Regional Advisory Council (RAC). Specifically, the role the RAC plays with each Field Office is to promote public awareness of mental health, substance use disorders, and developmental disabilities, and to help the public better understand individuals and their needs and services. RAC members stay informed about local needs and issues, and serve as advocates with public officials. The main objective of the RAC is to assist the Department in fulfilling its vision of

“easy access to high quality care that leads to a life of recovery and independence for the people we serve”. These advisory councils are required to have at least 50% of their membership comprised of consumers and family members to assure the inclusion of the consumer/family voice in determining needed services for the local region.

### **Office of Addictive Diseases**

The Division of Behavioral Health’s (DBH) Office of Addictive Diseases (OAD) provides leadership for adult and adolescent substance use disorder treatment services. The responsibilities include: program oversight, grants management; ensuring compliance with federal and state funding requirements; maintaining collaborative relationships with advocacy groups and other stakeholders; providing data and information at the regional and local levels to impact policy decisions; statewide technical assistance to providers and the six DBHDD Field Offices; developing and maintaining collaboration among private and public sector providers and stakeholders; providing training and information on best practices for substance use disorder treatment; coordinating collaborative efforts in increasing best practices models; assisting community and faith-based groups in developing capacity and training; overseeing HIV Early Intervention Services among substance users and their families and significant others; overseeing men’s residential treatment services throughout Georgia and the Women's Treatment and Recovery Services program; and carrying out gambling prevention and treatment activities.

The Office of Addictive Diseases and the Office of Adult Mental Health coordinate treatment and training issues regarding service delivery to those with co-occurring substance use and mental health disorders. By contract, all state providers of services must be co-occurring capable. Georgia has spent several years providing statewide training to ensure competency in assessing and treating both mental illness and substance use disorders. In addition, both offices share the same service definitions in the state Provider Manual and work in harmony to ensure that adults, children and adolescents have an integrated system of care.

### **Office of Behavioral Health Prevention**

DBH’s Office of Behavioral Health Prevention (OBHPFG) is the state agency charged with providing prevention leadership, strategic planning and services to improve the mental/emotional well-being of communities, families and individuals in Georgia. The OBHPFG develops and contracts for prevention services across the state specifically designed to reduce the risks and increase protective factors linked to substance use related problem behaviors, suicide, and mental health promotion. The office uses a public health approach (population based) and the Strategic Prevention Framework Model (Assessment, Capacity, Planning, Implementation and Evaluation).

### **Partners In Prevention Project (PIPP)**

The PIP Project is the continued evolution and expansion of the previous Alcohol Prevention Project (APP) and Alcohol Substance Abuse Prevention Project (ASAPP). It is a statewide initiative aimed at preventing alcohol and locally identified substances of abuse and promoting healthy lifestyles and choices among Georgians. Based on epidemiological data, early onset of alcohol use and abuse and binge drinking has continued to be identified as major public health and safety issues in Georgia. Using the Strategic Prevention Framework (SPF) model and a public health approach, the objective of PIPP is to implement evidence-based prevention strategies (programs/practices/policies) targeting the state’s identified priority need, Alcohol, and

to allow communities to address a second local priority need identified using local data. Research has demonstrated multilevel approaches have been more successful; therefore all communities are required to implement both an individual level and an environmental level strategies. The projects also require all providers to participate in a state level evaluation as well as conduct and share results of their local community evaluation. In addition, Providers are required to join with community coalitions and develop Community Prevention Alliance Workgroups (CPAW) to effectively implement the strategies and garner community buy-in for accomplishing the goals. PIPP currently funds 35 contractors across the six DBHDD regions.

### Expenditures for Substance Abuse Prevention and Treatment

All states receive federal funds for substance abuse prevention through Substance Abuse Prevention and Treatment Block Grant (SABG) funds administered by the Substance Abuse and Mental Health Services Administration (SAMHSA). Exhibit 1 shows the sources that Georgia used for expenditures on substance abuse prevention and treatment in 2021. As indicated, SABG funds and state funds account for the largest sources (35.47 percent and 34.39 percent, respectively).<sup>2</sup>

States submit Behavioral Assessment and Plan reports that include their priorities for use of SABG funds, as well as planned expenditures. For FY 2022-2023, Georgia designated reducing alcohol access and use among 9- to 25-year-olds as priority number seven for use of SABG funds.<sup>3</sup>

## State Performance: Laws, Enforcement, and Programs

As mandated by the STOP Act, this report details Georgia's performance in enacting, enforcing, and creating laws, regulations, and programs to prevent or reduce underage drinking.

The following sections address these measures:

***State Laws and Policies:*** These underage drinking prevention policies have been identified as best practices (or as promising practices suitable for ongoing evaluation) and fall into six categories:

- underage possession or purchase of alcohol
- underage drinking and driving
- alcohol availability
- sales and delivery to consumers at home
- alcohol pricing
- enforcement policies

***STOP Act State Survey Data:*** The STOP Act requires annual reporting of data from the 50 states and the District of Columbia on their performance in enacting, enforcing, and creating laws, regulations, and programs to prevent or reduce underage drinking. Administered since 2011, the STOP Act State Survey collects data on the following topics:

- enforcement programs to promote compliance with underage drinking laws and regulations
- programs targeted to youth, parents, and caregivers to deter underage drinking
- state interagency collaborations to implement prevention programs, best-practice standards, collaborations with tribal governments, and participation in underage drinking media campaigns
- state expenditures on the prevention of underage drinking

## Underage Possession or Purchase of Alcohol

Georgia-Underage Possession	
Is underage possession of alcoholic beverages prohibited?	Yes
Are there exceptions based on family relationships? <ul style="list-style-type: none"> <li>• Is possession allowed if parent or guardian is present or consents?</li> <li>• Is possession allowed if spouse is present or consents?</li> </ul>	Yes, in specified locations – see below  No

Does the retailer have the right to sue the minor for use of a false ID?	No
May the retailer detain a minor who used a false ID?	No
<p>Notes: In Georgia, the prohibition against furnishing to a minor does not apply when a retailer has been provided with "proper identification," defined as "any document issued by a governmental agency containing a description of the person, such person's photograph, or both, and giving such person's date of birth." When a reasonable or prudent person could reasonably be in doubt as to whether a customer is of legal drinking age, the retailer has a duty to request to see and to be furnished with proper identification in order to verify the customer's age, and the failure to make such request and verification in the case of an underage person may be considered by the trier of fact in determining whether the retailer furnishing the alcoholic beverage did so knowingly. See D.C. Code Ann. § 25-101(53). For purposes of this report, the "reasonable or prudent person" requirement is interpreted as providing the retailer a defense for reasonable reliance on an apparently valid ID.</p>

**Program Description:** To address the negative impact of alcohol use, Georgia's Office of Behavioral Health Prevention and Federal Grants (OBHPFG) has developed the Alcohol & Substance Abuse Prevention Project (ASAPP). Currently, 38 providers across the state are funded under ASAPP. The project aims to affect population-level change of behaviors and trends of alcohol and other substance use and abuse among youth and young adults ages 9–25. ASAPP uses the Substance Abuse and Mental Health Services Administration (SAMHSA) Center for Substance Abuse Prevention (CSAP) Strategic Prevention Framework (SPF) model to develop and implement strategies aimed at population-level change using the public health model approach. The objective of ASAPP is to implement statewide primary prevention strategies (programs/practices/policies) consistent with need as identified by epidemiological data, with the following goals:

1. Reduce access to alcohol among ages 9 to 20
2. Reduce binge drinking among ages 9 to 20
3. Reduce the early onset of alcohol use among ages 9 to 20
4. Reduce underage drinking rates
5. Reduce binge drinking and heavy drinking among ages 18 to 25
6. Reduce the misuse and abuse of specific additional substances (e.g., marijuana, tobacco, prescription drugs) targeted by individual providers
7. Identify the most effective strategies and key components for communities
8. Build and increase the capacity of the prevention workforce

<p><b>Program Description:</b> Each year, the Governor's Office and the Department of Behavioral Health and Developmental Disabilities (DBHDD), OBHPFG, and the Georgia Red Ribbon Committee recognize groups and communities that have done an exemplary job in promoting and educating others about drug awareness, drug-free living, and healthy lifestyle choices during the Georgia Red Ribbon Campaign. The Red Ribbon Campaign is a media and activity-driven strategy aimed at building universal awareness of the importance of a drug-free lifestyle. Each year, schools and communities are encouraged to develop messages and activities to demonstrate their commitment to living drug-free lifestyles. Red Ribbon events target schools and colleges, community-based organizations, corporations, media, coalitions, parents/parent groups, health professionals, legislators/policy makers, government employees, and the public.</p>

Best practice standards description: The SPF has been incorporated into almost every aspect of prevention in Georgia. This has allowed the OBHPFG to be strategic about the provision of prevention services and programs in Georgia and to increase utilization of evidence-based programs, practices, and policies. As a result, OBHPFG is able to target our services, show outcomes in our communities, and ensure long-term sustainability of evidence-based substance abuse/use prevention efforts. This model requires target communities to develop and implement strategies aimed at population-level change using the public health model approach and to use a comprehensive approach to develop and implement sustainable outcome-based prevention strategies. OBHPFG also used the Surgeon General's Call to Action to Prevent and Reduce Underage Drinking to assist in continuing to develop best practice standards.
