Using Multimedia to Introduce Your EBP

*Using Multimedia to Introduce Your EBP* is a collection of educational tools to help you introduce your Illness Management and Recovery (IMR) program to a variety of stakeholder groups, including the following:

- Mental health authorities;
- Advisory group members;
- Consumers;
- Families and other supporters; and
- Agency-wide staff.

Anyone who is trained in the IMR model (including evidence-based practices program leaders, staff, and advisory group members) should be able to use these tools during in-service training meetings or for community presentations to educate other stakeholder groups.

For references, see the booklet *The Evidence.*
This KIT is part of a series of Evidence-Based Practices KITs created by the Center for Mental Health Services, Substance Abuse and Mental Health Services Administration, U.S. Department of Health and Human Services.

This booklet is part of the Illness Management and Recovery KIT that includes a DVD, CD-ROM, and seven booklets:

- How to Use the Evidence-Based Practices KITs
- Getting Started with Evidence-Based Practices
- Building Your Program
- Training Frontline Staff
- Evaluating Your Program

Using Multimedia to Introduce Your EBP

Introductory Video

This film gives viewers basic information about the Illness Management and Recovery (IMR) program, including the following:

- Practice principles;
- Practice philosophy and values;
- Basic rationale for services; and
- How the evidence-based practice has helped consumers and families.

English and Spanish versions of the Introductory Video are included on the DVD in the KIT.

Sample Brochure

Using a brochure to introduce your IMR program to consumers, families, and community members is an easy way to disseminate basic information about IMR. We include a paper copy of English and Spanish versions in Appendix A of this booklet. Electronic copies are on the CD-ROM in this KIT so that you can tailor the brochure to your specific IMR program.
We encourage those who are trained in the IMR model to offer basic community presentations and in-service seminars using the Introductory PowerPoint slides in this KIT. We include a paper copy of the presentation in Appendix B of this booklet. An electronic copy is on the CD-ROM in this KIT so that you can tailor it to your specific IMR program.

The slides provide background information about the following:

- Evidence-based practices in general;
- Illness Management and Recovery;
- Practice principles; and
- Critical components of the evidence-based model.

Use the presentation along with the other tools in this section to educate a wide array of stakeholders.
Appendix A: Sample Brochure

Use this sample brochure to introduce your Illness Management and Recovery program in your community. Both English and Spanish versions are on the next few pages. Electronic copies are on the CD-ROM in this KIT.

Evidenced-based treatment works

Providing information, support, and skills to help consumers manage their mental illnesses and move forward in their own recovery process.
What is Illness Management and Recovery (IMR)?

IMR, an evidence-based practice, gives consumers information about mental illnesses and coping skills to help them:
- Manage their illnesses;
- Develop goals; and
- Make informed decisions about their treatment.

Why participate in IMR?

Knowledge empowers people. The more people understand the basic facts about their mental illnesses, the better equipped they are to speak for themselves and take an active role in their recovery.

How does IMR work?

- **Consumers define recovery**
  IMR practitioners help consumers define recovery for themselves and identify personally meaningful recovery goals.

- **Information is power**
  Education about mental illnesses is the foundation of informed decisionmaking.

- **Collaboration is key**
  Practitioners help consumers build social networks and engage supporters in activities that promote recovery.

- **Plans can help prevent relapses**
  Consumers learn to identify early warning signs and plan steps that they can take to prevent relapses.

- **Illness management strategies work**
  Consumers learn new strategies to help them manage their symptoms, cope with stress, and significantly improve their lives.

Illness Management and Recovery supports consumers in their recovery process.

Illness Management and Recovery
An Evidence-Based Practice
What Are Evidence-Based Practices?

Services that have consistently demonstrated their *effectiveness* in helping people with mental illnesses achieve their desired goals.

Effectiveness was established by different people who conducted rigorous studies and obtained similar outcomes.
Examples of Evidence-Based Practices

- Illness Management and Recovery
- Integrated Treatment for Co-Occurring Disorders
- Supported Employment
- Assertive Community Treatment
- Family Psychoeducation
Why Implement Evidence-Based Practices?

According to the New Freedom Commission on Mental Health:

State-of-the-art treatments, based on decades of research, are not being transferred from research to community settings
Why Implement Evidence-Based Practices? (continued)

According to the New Freedom Commission on Mental Health:

If effective treatments were more efficiently delivered through our mental health services system ... millions of Americans would be more successful in school, at work, and in their communities

—Michael Hogan, Chairman
What Is Illness Management and Recovery (IMR)?

By providing information about mental illnesses and coping skills, IMR empowers consumers to:

- Manage their illnesses;
- Develop their own goals for recovery; and
- Make informed decisions about their treatment.
Practice principles

- Consumers define recovery.
- Education about mental illnesses is the foundation of informed decisionmaking.
- The Stress-Vulnerability Model provides a blueprint for illness management.
- Collaborating with professionals and significant others helps consumers achieve their recovery goals.
- Relapse prevention planning reduces relapses and rehospitalizations.
- Consumers can learn new strategies for managing their symptoms, coping with stress, and improving their quality of life.
How Is IMR provided?

Trained IMR practitioners meet weekly with consumers either individually or as a group for 3 to 10 months.

Critical components of IMR are summarized in educational handouts that practitioners distribute and review with consumers during the sessions.
Topic Areas in IMR Handouts

- Recovery strategies
- Practical facts on mental illness
- Stress-Vulnerability Model and treatment strategies
- Building social support
- Using medication effectively
- Drug and alcohol use
- Reducing relapses
- Coping with stress
- Coping with problems and persistent symptoms
- Getting your needs met in the mental health system
Practitioners provide a variety of interventions including:

- Psychoeducation;
- Behavioral tailoring (for consumers who choose to take medication);
- Relapse prevention; and
- Coping skills training.
Psychoeducation

Psychoeducation uses evidence-based teaching methods to provide basic information about mental illnesses and treatment.
Behavioral Tailoring

Consumers who choose to take medications learn strategies to help manage daily medication regimes.
Relapse Prevention

Relapse prevention involves helping consumers identify triggers of past relapses and early warning signs of impending relapse.

Consumers learn how to develop plans for preventing relapses.
Coping Skills Training

Coping skills training helps consumers identify and enhance effective strategies that they currently use to deal with symptoms.

Consumers also learn and practice using new strategies.
Summary

IMR provides education about mental illnesses and strategies that help consumers manage their illnesses and pursue personal recovery goals.

People are empowered by knowledge. The more consumers understand the basic facts about their mental illnesses, the better equipped they are to speak for themselves and take an active role in their recovery.
